

BIRD COWL

Wind Directional Cowl

Features

- Rugged construction heavy duty design made in stainless steel
- Suitable for use in high wind zones
- Wind directional and always facing into the wind, thereby completely weather proof
- Aerodynamic properties which create a "suction force" that assists draw
- Designed to minimise wind and outdoor noises down the flue
- Flue diameter sizes from 150mm to 400mm
- Suits contemporary and traditional designs
