

# Chimney Pots

Domain Terraces Newmarket

**The Fireplace supply chimney pots made from hand crafted Terracotta Clay, Stainless Steel and Copper.**

Terracotta Clay Chimney Pots are made to fit up to a maximum flue size of 250mm diameter, the stainless steel and copper pots can be made to fit flues up to 300mm diameter. Whether for new installations or retro fits into existing masonry chimneys, there is a chimney pot to suit practically any residential situation, modern contemporary or traditional.

All Terracotta Clay Chimney Pots provided by The Fireplace can be painted on site, if colour variations are required.

Full installation instructions are provided with every chimney pot and details are also available on our website, [www.thefireplace.co.nz](http://www.thefireplace.co.nz).

### **Clay Chimney Pot Performance Statement**

All Terracotta Clay Chimney Pots are hand crafted products and may vary slightly dimensionally, due to the hand crafted and drying processes involved.

Due to the potential effects of environmental causes such as extreme winds and temperatures, icing, seismic activity and hail storms (to name a few), The Fireplace Ltd will not warranty against any cracks or breakages of the Terracotta Clay Chimney Pots. Chimney structure instability such as cracks and general deterioration may also affect the longevity of the chimney pots.

Bird proofing must be used to prevent birds nesting and causing possible fire hazards.
