

Hearth not required for Loft with Log Store

A contemporary strikingly designed gas fire.

Bringing a completely new gas stove aesthetic to the Gazco range, this tall and striking design creates an impressive focal point that can be styled to suit any interior.

The stove's tall firebox is framed with reflective black glass, adding a two tone contrast with a matt steel body. Soaring flames dance amongst a highly realistic fuel bed, composed of hand painted logs. An EchoFlame black glass lining continues the stove's glossy exterior styling details.

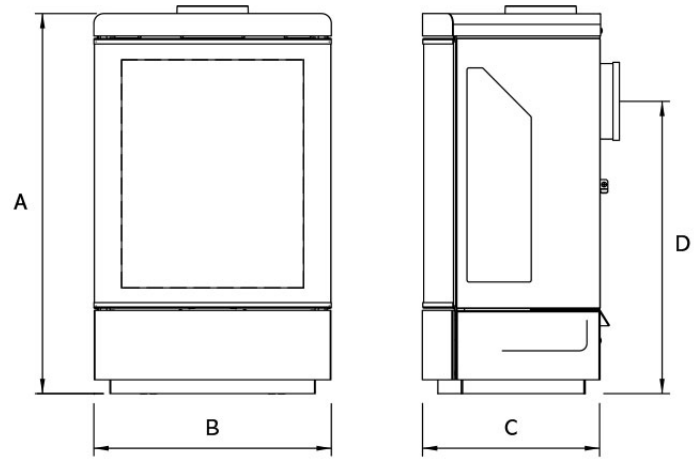

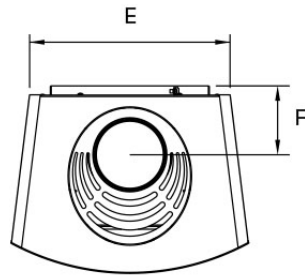

Key Features

-  Fan-free and quiet
-  Highly realistic flame & logs
-  3-sided glass viewing window
-  Direct vent, balanced flue technology
-  Programmable thermostatic remote control
