

A luxurious, hot fire with a large flame viewing area.

The Stovax Studio 2 Inset fire features the very latest Cleanburn Combustion System, allowing the logs to burn with outstanding efficiency, resulting in more heat delivery into the room and less going up the chimney. This technological advancement is achieved by introducing preheated, secondary air into the firebox to burn the excess hydrocarbons in the smoke.

Expertly designed, the Studio's clean, contemporary lines complement modern interiors. The fire provides outstanding flame pictures and superior heating efficiencies. Designed specifically to meet the stringent air regulations in New Zealand, the Stovax Studio 2 is also available as a freestanding fire.

The Studio offers you full control of flame aesthetics. From a lazy roll to a lively roar, you can adjust your fire to suit your mood.
